DETAILED ACTION

Response to Amendment

1 Applicant amendment overcomes §102(b) rejection of claims 26, 29, 30, 32, 34 and 37 and the rejection is withdrawn.

Applicant amendment overcomes §103(a) rejection of claims 1-6, 8, 11, 14-16, 18, 19, 21, 23, 25, 27, 28, 38 and 39 and the rejection is withdrawn.

Applicant amendment overcomes objection to claims 7, 10, 12, 13, 20, 31, 33 and 36 and the objection is withdrawn.

Allowable Subject Matter

2 Claims 1-54 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "a signal processor, responsive to said strain signals, for **determining the slope of an acoustic ridge in the k- ω plane** (emphasis added) to provide which provides a signal indicative of at least one parameter of the process flow flowing within the pipe". This feature **in combination with the remaining claimed structure** avoids the prior art of record.

Claims 2-8, 10-16, 18-21, 23, 25 and 39 depend from claim 1.

Claim 26 recites, in part, "a strap disposable about an outer circumference of a pipe, and a piezoelectric film material having a pair of conductors disposed on opposing surfaces thereof the **piezoelectric film material having a thickness greater than 8 mm** (emphasis added), wherein the piezoelectric film material is attached to the strap which transfers the strain of the pipe to the piezoelectric film material to thereby provide a strain measurement indicative of a pressure disturbance within the pipe". This feature **in combination with the remaining claimed structure** avoids the prior art of record.

Claims 27-34 and 36-38 depend from claim 26.

Claim 40 recites, in part, "**at least three strain sensors disposable about an outer circumference of the pipe at different axial locations along the pipe** (emphasis added), each of the strain sensors providing a respective strain signal indicative of a pressure disturbance within the pipe at a corresponding axial position". This feature **in combination with the remaining claimed structure** avoids the prior art of record.

Claims 41-54 depend from claim 40.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
